SUBJECT INDEX

P = Proceedings of the Anatomical Society of Great Britain and Ireland
(*dem*: Poster demonstration)

Accessory nerve, Central–peripheral transitional zone of the spinal accessory nerve in the rat (Nugent et al.) **175**, 19

Adenosine triphosphatase, Localisation and characterisation of putative transport adenosine triphosphatases in the murine ependyma (Cardy) **176**, 230*P*

Adrenal cortex, A preliminary study of acetylcholinesterase-positive innervation of the human adrenal cortex (Charlton et al.) **176**, 99

Adrenal gland, Effect of ACTH and aminoglutethimide on the catecholamine content of chromaffin cell morphology of the adrenal medulla in neonatal rats (Kent et al.) **179**, 238, *dem*

Microscopic anatomy of the baboon (*Papio hamadryas*) adrenal medulla (Al-Lami & Carmichael) **178**, 213

Morphometric analysis of adrenal gland growth in fetal and neonatal sheep. III. Volumes of the major organelles within zona fasciculata steroidogenic cells (Boshier & Holloway) **178**, 175

A preliminary study of acetylcholinesterase-positive innervation in the human adrenal cortex (Nkomazana et al.) **176**, 241*P*

Scanning electron microscopy of stellate cells of mammalian adrenal cortex as revealed by NaOH maceration (Martinotti et al.) **179**, 33

Ageing, Age-related changes in tendon fibrocartilage (Benjamin et al.) **179**, 127

The effect of age on target muscle recovery following nerve repair with a skeletal muscle autograft (Grieve) **176**, 234*P*

Stability of motor neuron number in the oculomotor and trochlear nuclei of the ageing mouse brain (Sturrock) **174**, 125

Stability of neuron number in the subthalamic and entopeduncular nuclei of the ageing mouse brain (Sturrock) **179**, 67

Stability of neuron number in the supraoptic and paraventricular nuclei of the ageing mouse brain (Sturrock) **176**, 233*P*

Variability in muscle fibre areas in whole human quadriceps muscle: effects of increasing age (Lexell & Taylor) **174**, 239

Ameloblasts, Development of the distal end and Tomes' processes of ameloblasts observed by freeze-fracture and ultrathin section electron microscopy (Franklin et al.) **174**, 103

Androgens, Perinatal androgen administration and the maintenance of sexually dimorphic and nondimorphic lumbosacral motor neuron groups in female Albino Swiss rats (Tobin & Payne) **177**, 47

Arcuate line, The arcuate line of the rectus sheath – does it exist? (Rizk) **175**, 1

Arteries, meningo-orbital, Homologies of the meningo-orbital arteries of humans: a reappraisal (Diamond) **178**, 223

Arteriovenous shunts, Evidence for a direct arteriovenous connection (A-V shunt) between the testicular artery and the pampiniform plexus in the spermatic cord of the tree shrew (*Tupaia glis*) (Rerkamnuaychoke et al.) **178**, 1

Axons, olivo-cerebellar, The rat of growth of compensatory olivo-cerebellar axons in the neonatal rat (Bower & Zevenhoven) **179**, 211*P*

Biocompatibility, Biocompatibility studies of a carbon fibre-polybutylene terephthalate composite material (Matthew) **176**, 239*P*

Bladder urinary, Codifying bladder mucosal surface change: indexing and interpretation possibilities (Hodges et al.) **179**, 246, *dem*

Putative sensory receptors in the superficial trigone of the human urinary bladder (Dixon) **179**, 245, *dem*

Blood vessels, Some morphological aspects of cryopreserved blood vessels (Laitung et al.) **179**, 227, *dem*

Blood vessels, cerebral, Preweaning environmental diversity causes some temporary effects on central blood vessels of artificially reared rats (Akbar et al.) **179**, 241, *dem*

Bone, Age-related differences in the proliferation of osteoblast-like cells cultured from post-mortem human bone tissue (Taylor et al.) **176**, 251, *dem*

The analysis of bone ingrowth into cementless total hip arthroplasty using scanning and back-scatter electron microscopy (Langkamer et al.) **179**, 226, *dem*

Biomechanics of healing osteochondral defects in goats and rabbits (Shahgaldi et al.) **179**, 221*P*

A comparison of finite element and linear scaling applied to measurement of the bones and muscles of the back (Richards et al.) **179**, 233, *dem*

The effect of disorders of cartilage formation and bone resorption on bone shape: a study with chondrodystrophic and osteopetrotic mouse mutants (Johnson et al.) **176**, 81

The effects of retinoids on the long bones of the rat and guinea pig (Keene et al.) **179**, 228, *dem*

Extracellular matrix in the cranial connective tissues of teleosts. II. Bone and dense fibrous connective tissues (Ralphs & Benjamin) **179**, 231, *dem*

Haemodynamic changes during bone healing in a model fracture (Brueton et al.) **179**, 219*P*

Junctions between osteoblasts and bone matrix compartmentalisation in early developing rat calvaria (Arana Chavez et al.) **179**, 229, *dem*

Long bone remodelling in the rat induced by the retinoid all-*trans*-retinoic acid (TRA): interpretation and possible misinterpretation of experimental results (Turton et al.) **176**, 253 *dem*

Measurements of resorption pit width and depth to assay osteoclastic function *in vitro* (Boyde et al.) **176**, 251 *dem*

Mineral density quantitation of cortical bone: age, sex and site variation in Soay sheep (Boyde et al.) **176**, 252 *dem*

The morphological response to treatment with indomethacin and flurbiprofen (Dickson) **179**, 228, *dem*

The orientation of the mineral crystals in the radius and the tibia of the sheep, and its variation with age (Bacon & Goodship) **179**, 15

Repopulation of demineralised bone by *in vitro* cultured rat osteoblasts (Mulholland et al.) **179**, 227, *dem*

Response of the intact rabbit tibia to simulated intramedullary nailing (Brookes et al.) **179**, *P*

The role of cytokines in bone remodelling (Gowen) **179**, 223*P*

Role of function in the maintenance of skeletal integrity (Rubin et al.) **179**, 223*P*

Skeletal secondary cellular responses to compressive mechanical loading *in vitro* (Shelton & El-Haj) **179**, 222*P*

The vascularity of the humeral head following experimental proximal humeral fractures (Brooks et al.) **179**, 220*P*

The vascular response of the intact rabbit femur to stimulated bone plating (Revell et al.) **179**, 220*P*

Bone remodelling, Prostacyclin production in osteocytes and lining cells may be an early strain-related step in mechanically adaptive bone remodelling (Rawlinson et al.) **179**, 218*P*

Theoretical prediction of bone remodelling using a damage stimulus (Prendergast et al.) **179**, 218*P*

Bone, scaphoid, The venous anatomy of the scaphoid (Handley & Pooley) **178**, 115

Bone trabeculae, Variations in the running pattern of trabeculae in growing human nasal bones (Niida et al.) **179**, 39

Bone, trabecular, An automated method for the measurement of trabecular bone morphology (Johnson et al.) **179**, 229, *dem*

Brain volume, Magnetic resonance imaging (MRI) and model-free estimates of brain volume determined using the Cavalieri principle (Mayhew & Olsen) **178**, 133

Stereological estimates of brain volumes from slices generated by magnetic resonance imaging (MRI) (Mayhew & Olsen), **179**, 211*P*

Breathnach, A. S., In memoriam: Professor A d'A Bellairs, **176**, 211

Bursa of Fabricius, Lymphoid follicle formation in the bursa of Fabricius in the chick embryo (Shiojiri et al.) **175**, 237

Capillaries, Intercellular junctions of cerebral and myocardial capillaries of the rat (Schulze & Firth) **176**, 268 *dem*

Carbonic anhydrase, Immunocytochemical localisation of carbonic anhydrase III in rat parotid gland (Asari et al.) **179**, 9

Cartilage, The effect of disorders of cartilage formation and bone resorption on bone shape: a study with chondrodystrophic and osteopetrotic mouse mutants (Johnson et al.) **176**, 81

Extracellular matrix in the cranial connective tissues of teleosts. I. Cartilage (Benjamin & Ralphs) **179**, 231, *dem*

Molecular anatomy of articular cartilage and its influence on degeneration and repair (Bayliss) **179**, 224*P*

Cavalieri principle, Magnetic resonance imaging (MRI) and model-free estimates of brain volume determined using the Cavalieri principle (Mayhew & Olsen) **178**, 133

Central grey matter, Ascending projections of ventrolateral central grey as shown by the PHA-L technique in the rat (Cooper et al.) **179**, 242, *dem*

Central–peripheral transitional zone, Central–peripheral transitional zone of the spinal accessory nerve in the rat (Nugent et al.) **175**, 19

Cerebellum, Some effects of undernutrition and subsequent rehabilitation on connectivity in the cerebellar cortex of young adult rats (Yucel et al.) **179**, 241, *dem*

Cerebral cortical neurons, Ultrastructural characteristics of human adult and infant cerebral cortical neurons (Ong & Garey) **175**, 79

Chloride cells, A morphometric analysis of chloride cells in the gills of the teleosts *Oreochromis alcalicus* and *Oreochromis niloticus* and a description of presumptive urea-excreting cells in *O. alcalicus* (Maini) **175**, 131

Chondrocytes, Morphometry of cytoplasmic components of mammalian articular chondrocytes and corneal keratocytes: species and zonal variations of mitochondria in relation to nutrition (Stockwell) **175**, 251

Chondrocytic clone behaviour, Computer simulations of chondrocytic clone behaviour in rabbit growth plates (Moss-Salentijn et al.) **175**, 19

Chondrodystrophy, The effect of disorders of cartilage formation and bone resorption on bone shape: a study into chondrodystrophic and osteopetrotic mouse mutants (Johanson et al.) **176**, 81

Chordae tendineae, Ultrastructural quantification of collagen fibrils in chordae tendineae of the sheep and rabbit (Berkovitz & Robinson) **178**, 127

Chorioallantoic membrane, Differentiation of the chick chorioallantoic membrane under normoxic and normobaric hypoxic and hyperoxic conditions (Burton & Palmer) **179**, 213*P*

Chromaffin cells, The chromaffin cells of urodele amphibians (Accordi) **179**, 1

Exogenous NGF may not be essential for small numbers of fetal rat adrenal chromaffin cells to express a neuronal phenotype (Earl & Bird) **179**, 239, *dem*

Circle of Willis, A comparative study of the circle of Willis in fetal and adult life. The configuration of the bifurcation of the posterior communicating artery (Overbeeke et al.) **176**, 45

Cleft palate, Changes in the composition of glycosoaminoglycans during cleft palate formation in the rat (Singh et al.) **179**, 237, *dem*

Collagen, Collagen fibril morphometry in transected rat extensor tendons (Matthew & Moore) **175**, 263

Ultrastructural quantification of collagen fibrils in chordae tendineae of the sheep and rabbit (Berkovitz & Robinson) **178**, 127

Confocal microscopy, Three-dimensional image recording and analysis with a real-time direct-view confocal microscope (Boyde) **176**, 251, *dem*

Conjunctiva, Branches from the intraocular sensory nerves innervate the conjunctiva and other adnexa in cynomolgus monkeys (Ruskell & Simons) **176**, 245*P*

Morphology of corpuscular nerve endings in the limbal conjunctiva of the human eye (Lawrenson & Ruskell) **176**, 244*P*

The structure of corpuscular nerve endings in the limbal conjunctiva of the human eye (Lawrenson & Ruskell) **177**, 75

Corneal keratocytes, Morphometry of cytoplasmic components of mammalian articular chondrocytes and corneal keratocytes: species and zonal variations of mitochondria in relation to nutrition (Stockwell) **175**, 251

Corpus luteum, Structural and functional reserve of steroidogenic membranes in stimulated luteal cells of pregnant rats (Meyer & Bruce) **177**, 31

Cortex, auditory, Comparison of histochemical staining in the cat and human primary auditory cortex (Wallace) **176**, 232*P*

Corticosubthalamic pathway, The organization of the corticosubthalamic pathway in the rat: a study using wheatgerm agglutinated-horseradish peroxidase (Toledana & Crossman) **176**, 231*P*

Cumulus cells, A serial and goniometer study of cell-cell junctions between human cumulus cells using transmission electron microscopy (He et al.) **179**, 250, *dem*

Cytokeratins, Cytokeratins in rat odontogenesis (McKenna) **176**, 246*P*

Cytokines, The role of cytokines in bone remodelling (Govern) **179**, *P*

Dendritic spines, Methods of estimation of spine density – are spines evenly distributed throughout the dendritic field? (Horner & Arbuthnott) **177**, 179

Dental lamina, The development and fate of the dental laminal of the mandibular first molar tooth in the rat (Khaejornbut et al.) **179**, 85

Desmin, Effects of age on fibre structure, ultrastructure and expression of desmin and spectrum in fast- and slow-twitch rat muscles (Ansved & Edström) **174**, 61

Desmosomes, Morphological distinction between filaments that converge upon desmosomes and those that are attached to hemidesmosomes in the epidermis of anuran larvae and lampreys (Joazeiro et al.) **175**, 27

Dissection, Dissection as a cause of stress in first-year medical students (Evans & Fitzgibbon) **179**, *dem*

A simple device for computerised collection of coordinate measurements from dissection of the back (Evans & Richards) **179**, 233, *dem*

Dopamine, The effects of dopamine on neurites and growth cones of mammalian spinal cord neurons *in vitro* (Norman et al.) **176**, 260 *dem*

Eiconsanoids, A study of the capacity of various eicosanoids to stimulate skeletal muscle formation in chicken embryos (McLennan) **174**, 115

Elastic fibres, Demonstration of elastic fibres with reagents for detection of magnesium (Müller & Firsching) **175**, 195

Elbow joint, The ulnar collateral ligament of the human elbow joint. Anatomy, function and biomechanics (Fuss) **175**, 203

Enamel, Development of the distal end and Tomes' processes of ameloblasts observed by freeze-fracture and ultrathin electron microscopy (Franklin et al.) **174**, 103

The development of enamel tubules during the formation of enamel in the marsupial *Monodelphis domestica* (Sasagawa & Ferguson) **179**, 47

Enteric ganglia, Montage of an enteric ganglion–resemblance to organisation of CNS (Komuro et al.) **176**, 260, *dem*

Ependyma, Localisation and characterisation of putative transport adenosine triphosphatases in the murine ependyma (Cardy) **176**, 230*P*

Epidermis, Adenosine triphosphatase-positive Langerhans-like cells in the epidermis of the chicken (Carrillo-Farga et al.) **176**, 1

Epididymis, The response of the regional lymph node to epididymal sperm granulomas after vasectomy (McDonald et al.) **176**, 35

Epiphyses, On the function and classification of epiphyses (Grandage) **176**, 236*P*

Ethanol, Cytoplasmic inclusions accumulate in adult mouse sensory neurons following ethanol and acetaldehyde exposure *in vitro* (Smith and Winbetu) **176**, 264, *dem*

Extracellular matrix, Extracellular matrix of connective tissues in the heads of teleosts (Benjamin & Ralphs) **179**, 137

Extracellular matrix in the cranial connective tissues of teleosts. I. Cartilage (Benjamin & Ralphs) **179**, 231, *dem*

Extracellular matrix in the cranial connective tissues of teleosts. II. Bone and dense fibrous connective tissues (Ralphs & Benjamin) **179**, 231, *dem*

Tail fin regeneration in teleosts: cell-extracellular matrix interaction in blastemal differentiation (Santa-Maria & Becerra) **176**, 9

Eye, Effects of 5-bromo-2′-deoxyuridine on eye development in rats (Mansfield et al.) **176**, 261 *dem*

The effect of neonatal monocular enucleation on the optic nerves of the rat (Nicoll et al.) **174**, 27

Normal anatomy of the aqueous humour outflow system in the domestic pig eye (McMenamin & Steptoe) **178**, 65

Fibroblasts, Variability of fibroblast morphology *in vivo*: a silver impregnation study on human digital dermis and subcutis (Novotny & Gnoth) **177**, 195

Fibrocartilage, Age-related changes in tendon fibrocartilage (Benjamin et al.) **179**, 127

Fibrocartilage in the meniscal horns of the human knee joint (Benjamin et al.) **179**, 216*P*

The structure and immunohistochemistry of the suprapatella in the rat – a study of tendon fibrocartilage (Ralphs et al.) **176**, 269, *dem*

Tendon fibrocartilage in the rat. I. Development (Ralphs et al.) **179**, 231, *dem*

Fibronectin, The effect of fibronectin on cultures of precardiac mesoderm cells from the chick embryo (Pollock et al.) **176**, 246*P*

Foot, The anatomy of a human foot with missing toes and reduplication of the hallux (Hootnick et al.) **174**, 1

Foramen magnum, A tubercle at the anterior margin of the foramen magnum (Lakhtakia et al.) **177**, 209

Frontonasal process, Effect of frontonasal process extirpation in the chick embryo (McCann) **176**, 245*P*

Galactose-induced neuropathy, Effect of galactose-induce endoneurial oedema on perineurial tight junctions in the rat (Beamish et al.) **176**, 240*P*

Ganglia, paracervical, Demonstration of the coexistence of substance P and enkephalin in the nerve terminals of the guinea pig paracervical ganglia (Mitchell & Stauber) **179**, 245, *dem*

Ganglion, stellate, The intrinsic microvasculature of the rat stellate ganglion (Lingam & Santer) **179**, 244, *dem*

Ganglion, superior cervical, Topography of functional subpopulations of neurons in the superior cervical ganglion of the rat (Flett & Bell) **177**, 55

GAP 43, Axotomy induces a differential increase in expression of GAP 43 in small and large adult rat primary afferent neurons (Somervaille) **176**, 243*P*

GAP-43 in neurons of the mature mammalian brain during regeneration of their axons (Campbell et al.) **176**, 257, *dem*

Gap junctions, Presence of gap junctions in the blood-forming system (Rosendaal) **176**, 237*P*

Glia, Expression of vimentin and glial fibrillary acidic protein in the developing rat spinal cord: an immunocytochemical study of the spinal cord glial system (Oudega & Marani) **179**, 97

Glial fibrillary acid protein, Glial fibrillary acidic protein (GFAP) expression in hydrocephalic ependyma (Collins & Goulding) **176**, 230*P*

Sexual dimorphism in the distribution of glial fibrillary acidic protein in the supraoptic nucleus of the hamster (Suárez et al.) **178**, 79

Goblet cells, Effect of site variation on radiation response of goblet cells (Carr et al.) **176**, 270, *dem*

Gonadotrophin, chorionic, Cellular dynamics of eCG production by chorionic girdle and endometrial cup cells (Wooding & Billingsley) **179**, 213*P*

Gonads, Histochemical identification of primordial germ cells and differentiation of the gonads in homozygous tetraploid mouse embryos (Kaufman) **179**, 169

Histogenesis and organogenesis of the gonad in human embryos (Satoh) **177**, 85

Growth hormone, Response of normal and hypertrophying mouse skeletal muscles to low-dose growth hormone treatment (Sanghar) **176**, 233*P*

Hair, Innervation of hairs in the facial skin of marsupial mammals (Loo & Halata) **174**, 207

Hair follicles, Intranuclear rodlets and associated bodies in normal cultured human hair follicle dermal papilla cells (Tobin et al.) **176**, 248*P*

Haematopoiesis, Extramedullary haematopoiesis in osteopetrotic mice (Thomas et al.) **176**, 238*P*

Haematopoietic stem cell proliferation regulators investigated using an *in vitro* assay (Robinson & Riches) **174**, 153

The mode of action of the tetrapeptide AcSDKP in regulating haematopoietic stem cell proliferation (Robinson et al.) **179**, 212*P*

Haemopoiesis, Haemopoietic phagocytes in the early differentiating avian retina (Cuadros et al.) **177**, 145

Harderian gland, Number of mast cells in the Harderian gland of the green frog, *Rana esculenta*: the animal cycle and its relation to environmental and hormonal factors (Chieffi Baccari et al.) **179**, 75

Heart, Development and morphology of the membranous portion of the interventricular septum in the human heart (Hassan) **176**, 235*P*

The effects of dietary potassium depletion on the ultrastructure of cardiac ventricular myocytes in rabbits: a morphometric study (Skepper et al.) **179**, 59

Immunohistochemical studies on the localisation and ontogeny of heart fatty acid binding protein in the rat (Watanabe et al.) **174**, 81

A prospective and controlled study evaluating the presence of interatrial septum variations in relation to cardiac sources of peripheral emboli (Cambier et al.) **176**, 235*P*

Ultrastructural quantification of collagen fibrils in chordae tendineae of the sheep and rabbit (Berkovitz & Robinson) **178**, 127

Hemidesmosomes, Morphological distinction between filaments that converge upon desmosomes and those that are attached to hemidesmosomes in the epidermis of anuran larvae and lampreys (Joazeiro et al.) **175**, 27

Hernia, congenital diaphragmatic, Congenital diaphragmatic hernia through the oesophageal hiatus with nonrotation of the midgut (Chandraraj & Briggs) **178**, 265

Hippocampus, Neural plasticity of the hippocampal (CAI) pyramidal cell–quantitative changes in spine density following handling and injection for drug testing (Homer et al.) **174**, 229

Synthesis of plasminogen activators by late embryonic rat hippocampi (Andrews & Seely) **176**, 272, *dem*

The topography of hippocampal CAI field connectivity in the rat (Chan et al.) **176**, 264, *dem*

Humerus, The intraosseous arterial anatomy of the human humeral head (Brooks et al.) **179**, 230, *dem*

Hydrocephalus, Glial fibrillary acidic protein (GFAP) expression in hydrocephalic ependyma (Collins & Goulding) **176**, 230*P*

Hydroxyapatite, Investigations into the mechanisms of toxicity of finely ground hydroxyapatite particles on rat fibroblasts *in vitro* (Clarke-Smith) **176**, 238*P*

IGF-1 and IGF-2, Localization of IGF-1 and IGF-2 in a range of vertebrate skeletal muscle tissue (Rawlinson et al.) **176**, 267, *dem*

IGF-II, The expression of IGF-II in the early post-implantation rat conceptus (Florance et al.) **175**, 169

Implants, cerebral, Cerebrovascular responsiveness to hypercapnia in intracerebral neuronal implants (Sharkey et al.) **176**, 272, *dem*

Distinct profiles of recovery following embryonic nigral grafts in caudate nucleus or putamen of marmosets (Annett et al.), **176**, 257, *dem*

Intervertebral discs, A functional description of the intervertebral disc (McNally et al.) **179**, 226, *dem*

Morphometric changes in the heights and anterio-posterior diameters of the lumbar intervertebral discs with age (Amonoo-Kuofi) **175**, 159

Intirna, A computerised morphometric technique for the analysis of intimal hyperplasia (Tennant & McGeachie) **178**, 119

Irradiation, Correlation between AgNOR size and number in normal and irradiated tissue (McDermott et al.) **179**, 247, *dem*

Effects of X-rays or neon ion particles on small intestinal structural parameters (Carr et al.) **179**, 247, *dem*

Joints, lumbar apophyseal, Human lumbar apophyseal joints – stiffness of the articular cartilage and its implications for function (Swanepoel et al.) **179**, 216*P*

Joints, zygapophysial, The role of zygapophyseal joint orientation and uncinate processes in controlling motion in the cervical spine (Milne) **178**, 189

Kidney, The relative sizes and asymmetry of kidneys in passerine birds from Australia and North America (Richardson et al.) **175**, 181

Knee joint, Anatomy and function of the cruciate ligaments of the domestic pig (*Sus scrofa domestica*): a comparison with human cruciates (Fuss) **178**, 11

Differences in the amounts of calcified tissues beneath the attachments of the meniscal horns in the knee joint of man (Rao et al.) **176**, 270, *dem*

Knee joint, Fibrocartilage in the meniscal horns of the human knee joint (Benjamin et al.) **179**, 216*P*

Quantitative differences in the histology of the attachment zones of the meniscal horns in the knee joint of man (Benjamin et al.) **179**, 127

Voluntary rotation in the human knee joint (Fuss) **179**, 115

Langerhans cells, Adenosine triphosphatase–positive Langerhans-like cells in the epidermis of the chicken (Carrillo-Farga et al.) **176**, 1

Ultrastructural identification of Langerhans cells in normal swine epidermis (Romano & Balaguer) **179**, 43

Larynx, Ossification of the laryngeal cartilages (Pryke) **176**, 236*P*

Ligaments, cruciate, Anatomy and function of the cruciate ligaments of the domestic pig (*Sus scrofa domestica*): a comparison with human cruciates (Fuss) **178**, 11

Ligament, nuchal, Ultrastructure of the bovine nuchal ligament (Morocutti et al.) **178**, 145

Ligament, patellar, Variations in the amount of calcified tissue at the attachments of the quadriceps tendon and patellar ligament in man (Evans et al.) **174**, 145

Liver, An electron-microscopical study of the relationships between differentiating blood-cell precursors, macrophages and hepatocytes in murine fetal liver (Blair et al.) **179**, 249, *dem*

Morphological relationships of differentiating blood cell precursors to adjacent macrophages and hepatocytes in murine liver (Blair) **176**, 237*P*

Locust, The distribution and nature of presynaptic inputs to campaniform sensillar afferents in the locust (*Shistocerca gregaria*) (England) **176**, 244*P*

Lymph nodes, Dilatation of high endothelial venules in compartments of rat lymph nodes with abundant cortical mast cells (Sainte-Marie & Peng) **174**, 163

A quantitative EM-analysis of the innervation of rat axillary lymph nodes (Novotny & Krücken) **176**, 242*P*

Relationships between lymphoid nodules and lymph sinuses in lymph nodes: a study in horses (Heath & Nickles) **178**, 39

The response of the regional lymph node to epididymal sperm granulomas after vasectomy (McDonald et al.) **176**, 35

A study of modified lymphatics in the deep cortex of ruminant lymph nodes (Nicander et al.) **178**, 203

Thymus-dependent regions of the testicular lymph nodes show increased development following vasectomy (McDonald et al.) **176**, 269, *dem*

Topography of the major superficial lymph nodes and their efferent lymph pathways in the

koala (*Phascolarctos cinerens*) (Hanger & Heath) **177**, 67

Lymphoid follicles, Lymphoid follicle formation in the bursa of Fabricius of the chick embryo (Shiojiri et al.) **175**, 237

Macrophages, The distribution of uterine macrophages in virgin and early pregnant mice (Stewart & Mitchell) **179**, 183

Manubrium sterni, The relationship between age at death and manubrio-costal and manubriosternal synostosis (Watts) **176**, 237*P*

Marsupials, Innervation of hairs in the facial skin of marsupial mammals (Loo & Halata) **174**, 207

Mast cells, Dilatation of high endothelial venules in compartments of rat lymph nodes with abundant cortical mast cells (Sainte-Marie & Peng) **174**, 163

Number of mast cells in the Harderian gland of the green frog, *Rana esculenta*: the annual cycle and its relation to environmental and hormonal factors (Chieffi Baccari et al.) **179**, 75

The ultrastructure of mast cells in the uterus throughout the normal menstrual cycle and the postmenopause (Drudy et al.) **175**, 51

Megakaryocytes, Autoradiographic analysis of vasoactive neuropeptide uptake by rabbit megakaryocytes and platelets (Daimon) **176**, 105

Memory, Neuronal circuitry underlying recognition memory (Fahy et al.) **179**, 209*P*

Meniscal horns, Quantitative differences in the histology of the attachment zones of the meniscal horns in the knee joints of Man (Benjamin et al.) **177**, 127

Mesentery, Enlargement of the mesenteric nerves and arteries supplying the hypertrophic ileum of the rat (Cracco & Gabella) **176**, 263, *dem*

Mesonephros, Morphological development and fate of the mouse mesonephros (Smith & Mackay) **174**, 171

Microglia, Expression of major histocompatibility complex and leukocyte common antigens in amoeboid microglia in postnatal rats (Ling et al.) **177**, 117

A lectin histochemistry study on the development of rat microglial cells (Boya et al.) **175**, 229

Milk-ejection reflex, Connections and fibre pathways of the lateral tegmentum subserving the milk-ejection reflex (Juss & Wakerley) **179**, 242, *dem*

Molar teeth, Reinnervation of developing rat molars (Johnston & Owens) **176**, 169

Motoneurons, Dendritic structure of intracellularly labelled neonatal rat hindlimb flexor motoneurons studied by fluorescence confocal microscopy (Dekkers et al.) **176**, 255, *dem*

Morphological changes in sciatic pool motoneurons following postnatal nerve crush in the rat (O'Hanlon & Lowrie) **176**, 259, *dem*

Regeneration of motoneurons to functionally appropriate and inappropriate muscles in young and adult rats (Hrycyshyn et al.) **176**, 258, *dem*

Stability of motor neuron number in the oculomotor and trochlear nuclei of the ageing mouse brain (Sturrock) **174**, 125

Transplantation of embryonic and spinal motoneurons into intact and motoneuron-depleted spinal cord of adult rats (Sieradzan & Vrbova) **176**, 266, *dem*

Mouse embryos, Intraocular growth and differentiation of tissue fragments isolated from primitive streak-stage mouse embryos (Chan) **175**, 41

Muscle, A comparison of finite element and linear scaling applied to measurements of the bones and muscles of the back (Richards et al.) **179**, 233, *dem*

Effects of age on fibre structure, ultrastructure and expression of desmin and spectrin in fast- and slow-twitch rat muscles (Ansved & Edström) **174**, 61

Localization of IGF-1 and IGF-2 in a range of vertebrate skeletal muscle tissue (Rawlinson et al.) **176**, 267, *dem*

Morphometry of the human thigh muscles. A comparison between anatomical sections and computer tomographic and magnetic resonance images (Engstrom et al.) **176**, 139

Ratios of cross-sectional areas of muscles and their tendons in a healthy human forearm (Cutts et al.) **176**, 133

Scanning electron microscopy of *in situ* murine skeletal muscle satellite cells before and after cold injury (Jeffries & Mahon) **179**, 234, *dem*

Muscle, abductor pollicis longus, Structure and function of the abductor pollicis longus muscle (Oodenaarde) **174**, 221

Muscle, cleidotrachelian, The cleidotrachelian muscle: an anomalous muscle crossing the supraclavicular triangle (Newell) **179**, 232, *dem*

Muscle, cricopharyngeus, The arrangement of muscle fibres in human cricopharyngeus: three-dimensional reconstructions (Dillon et al.) **176**, 268, *dem*

A histological and histochemical study of the arrangement of fibres in human cricopharyngeus muscles (Dillon) **176**, 234*P*

Muscle, gracilis, The arterial anatomy and surgical relevance of the human gracilis muscle (Patel et al.) **176**, 270, *dem*

Muscle, iliocostalis, Muscle fibre directions of iliocostalis and multifidus: male–female differences (Biedermann et al.) **179**, 163

Muscle, multifidus, Muscle fibre directions of iliocostalis and multifidus: male–female differences (Biedermann et al.) **179**, 163

Muscle, quadriceps, Variability in muscle fibre areas in whole human quadriceps muscle: effects of increasing age (Lexell & Taylor) **174**, 239

Muscle, reinnervation of, Innervation of a muscle by embryonic neurons grafted into the spinal cord of adult rats (Clowry et al.) **176**, 267, *dem*

Muscle, reinnervation of, Redistribution of territory of L_4 axons on reinnervation of fast muscles of rats (Albani & Vrbova) **176**, 266, *dem*

Muscle, skeletal, The effect of age on target muscle recovery, following nerve repair with a skeletal muscle autograft (Grieve) **176**, 234*P*

Functional adaptation in muscle: the cellular basis of training (Goldspink et al.) **179**, 224*P*

Prostaglandin synthetase and prostacyclin synthetase in mature rat skeletal muscles: immunohistochemical and localisation to arterioles, tendons and connective tissues (McLennan & Macdonald) **178**, 243

Responses of normal and hypertrophying mouse skeletal muscles to low-dose growth hormone treatment (Sangar) **176**, 233*P*

Skeletal muscle in the genetically obese mouse (genotype *ob/ob*) (Stickland et al.) **179**, 217*P*

A study of the capacity of various eicosanoids to stimulate skeletal muscle formation in chicken embryos (McLennan) **174**, 115

Muscle, striated, Remodelling of the contractile apparatus of striated muscle stimulated electrically in a shortened position (Jakubiec-Puka & Carraro) **178**, 83

Muscle, tensor tympani, Neonatal myosin in bovine and pig tensor tympani muscle fibres (Scapolo et al.) **178**, 255

Muscle transplantation, Neovascularization and muscle regeneration in free muscle transplants. An experimental investigation in the rat (Noah et al.) **179**, 217*P*

Myosin, neonatal, Neonatal myosin in bovine and pig tensor tympani muscle fibres (Scapolo et al.) **178**, 255

Nerve, chorda tympani, Axon populations in cat lingual and chorda tympani nerves (Holland et al.) **179**, 210*P*

Nerve endings, corpuscular, The structure of corpuscular nerve endings in the limbal conjunctiva of the human eye (Lawrenson & Runskell) **177**, 75

Nerve growth factor, Exogenous NGF may not be essential for small numbers of fetal rat adrenal chromaffin cells to express a neuronal phenotype (Earl & Bird) **179**, 239, *dem*

Nerve, lingual, Axon populations in cat lingual and chorda tympani nerves (Holland et al.) **179**, 210*P*

Nerve, vagus, The oxytocin (OT) innervation of the dorsal vagal complex (DVC) of the female rat: immunohistochemical and electrophysiological studies (Tolchard & Ingram) **179**, 243, *dem*

Ultrastructural changes in the nodose ganglion cells following an intraneural injection of Ricinus communis agglutinin-60 into vagus nerve in hamsters (Ling et al.) **179**, 23

Neuroendocrine system, Immunolocalisation of the neuronal marker PGP 9·5 in the neuroendocrine system of the developing rat (Rowe & Kent) **179**, 239, *dem*

Neuronal processes, Heterogeneity and interactions among neuronal processes presynaptic to sensory afferents (Watson) **179**, 210*P*

Neurons, Ultrastructural characteristics of human adult and cerebral cortical neurons (Ong & Garey) **175**, 79

Neurons, cholinergic, Cholinergic neurons in the rat brainstem do not project to the lumbar spinal cord (Sherriff et al.) **176**, 261, *dem*

Neurons, cortical, Differences in inter-bouton distance between intracortical axons of different classes of pyramidal neuron in rat visual cortex (Nicoll & Blakemore) **179**, 209*P*

Neurons, motor, Perinatal androgen administration and the maintenance of sexually dimorphic and nondimorphic lumbosacral motor neuron groups in female Albino Swiss rats (Tobin & Payne) **177**, 47

Neurons, neurosecretory, Peptide accretions in the endoplasmic reticulum of magnocellular neurosecretory neurons in normal and experimentally manipulated rats (Pow et al.) **178**, 155

Neurons, sensory, Cytoplasmic inclusions accumulate in adult mouse sensory neurons following ethanol and acetaldehyde exposure *in vitro* (Smith & Wubetu) **176**, 264, *dem*

Neurons, superior cervical ganglion, Topography of functional subpopulations of neurons in the superior cervical ganglion of the rat (Flett & Bell) **177**, 55

Neurosecretion, Peptide accretions in the endoplasmic reticulum of magnocellular neurosecretory neurons in normal and experimentally manipulated rats (Pow et al.) **178**, 155

Nodose ganglion, Central projections of the nodose ganglion and the origin of vagal efferents in the lamb (Wild et al.) **175**, 105

Ultrastructural changes of the nodose ganglion cells following an intraneural injection of Ricinus communis agglutin-60 into the vagus nerve in hamsters (Ling et al.) **179**, 23

Nose, Variations in the running pattern of trabeculae in growing human nasal bones (Niida et al.) **179**, 39

Nucleolus, Correlation between AgNOR size and number in normal and irradiated tissue (McDermott et al.) **179**, 247, *dem*

Nucleus, entopenduncular, Stability of neuron number in the subthalamic and entopeduncular nuclei of the ageing mouse brain (Sturrock) **179**, 67

Nucleus, inferior olivary, Inferior olive afferents following unilateral cerebellar pedunculotomy in the neonatal rat (Reedy & Bower) **179**, 211*P*

Nucleus, inferior olivary, Neuronal population of the rat inferior olivary nucleus during the early postnatal period (Piyawinijwong et al.) **179**, 240, *dem*

Nucleus, subthalamic, Stability of neuron number in the subthalamic and entopeduncular nuclei of the ageing mouse brain (Sturrock) **179**, 67

Nucleus, supraoptic and paraventricular, Stability of neuron number in the supraoptic and paraventricular nuclei of the ageing mouse brain (Sturrock) **176**, 233*P*

Obese mouse, Skeletal muscle in the genetically obese mouse (genotype *ob/ob*) (Stickland et al.) **179**, 217*P*

Odontogenesis, Cytokeratins in rat odontogenesis (McKenna) **176**, 246*P*

Oesophagitis, A scanning electron microscope study of reflux oesophagitis (Danton et al.) **176**, 247*P*

Optic nerve, Axon trajectories within the optic nerve head of developing chicken (Kiel & Cook) **176**, 263, *dem*

The effect of neonatal monocular enucleation on the optic nerves of the rat (Nicoll et al.) **174**, 27
Localization of calcium ions and calcium-ATPase activity within myelinated nerve fibres of the adult guinea-pig optic nerve (Maxwell et al.) **176**, 71
Quantitative study of the development of the optic nerve in rats reared in the dark during early postnatal life (Fukui et al.) **174**, 37
Optic tectum, The long-term effect of taxol on explants of developing chick optic tectum in culture (Bird) **174**, 1
Osteoclast function, Measurement of resorption pit width and depth to assay osteoclastic function *in vitro* (Boyde et al.) **176**, 251, *dem*
Osteodystrophy, The effect of disorders of cartilage formation and bone resorption on bone shape: a study with chondrodystrophic and osteopetrotic mouse mutants (Johanson et al.) **176**, 81
Osteoinduction, Osteoinductive potential of human demineralised bone and a bioceramic in the abdominal musculature of the rat (Nolan et al.) **174**, 97
Osteopetrosis, Extramedullary haematopoiesis in osteopetrotic mice (Thomas et al.) **176**, 238*P*
Ovary, Interstitial gland cells of the rat ovary: an ultrastructural and immunohistochemical study (El-Maasarany) **179**, 236, *dem*
Isolation of fetal and neonatal mouse Sertoli cells and their effects on the differentiation of fetal mouse ovaries *in vitro* (Mackay et al.) **176**, 264, *dem*
Oocyte migration and loss at the surface of cultured mouse ovaries (Haig et al.)**179**, 235, *dem*
Oviductal epithelium, Regional differences in the ultrastructural features of secretory cells in the golden hamster (*Mesocricetus auratus*) oviductal epithelium (Abe & Oikawa) **175**, 147

Palate, Disturbed mesenchymal cell activity in the developing secondary palate of the rat (Singh & Moxham) **179**, 251, *dem*
Paracervical ganglion, Peptidergic projections of the guinea-pig paracervical ganglion (Ahmed & Mitchell) **176**, 243*P*
Parotid gland, Immunocytochemical localisation of carbonic anhydrase III in rat parotid gland (Asari et al.) **179**, 9
Ultrastructure of the mink parotid gland (Tandler) **177**, 185
Passerine birds, The relative sizes and asymmetry of kidneys in passerine birds from Australia and North America (Richardson et al.) **175**, 181
Patella, A complete intra-articular fat pad around the human patella (Newell) **179**, 232, *dem*
Pelvic ganglion, Specific patterns of immunoreactivity in neuronal elements of the anterior major pelvic ganglion of the male guinea-pig (Dhami & Mitchell) **176**, 197
Perineurium, Changes in the perineurium of the rat peripheral nerve in response to a minute focal puncture (Payne) **176**, 241*P*
Effect of galactose-induced endoneurial oedema on perineurial tight junctions in the rat (Beamish et al.) **176**, 240*P*
Peripheral nerve, Axonal regeneration from transected rat sciatic nerve to appropriate and inappropriate distal stumps (Abernethy et al.) **176**, 240*P*
Factors affecting regenerative axonal growth of adult CNS neurons into peripheral grafts: studies using retrograde cell labelling with HRP (Morrow et al.) **176**, 229*P*
Peritoneum, Immunocytochemical study of the peritoneum in CAPD patients (Stephenson et al.) **179**, 248, *dem*
The peritoneal elastic lamina (Knudsen) **177**, 41
Placenta, Distribution of 9 kD calcium binding protein in ruminant placenta (Wooding et al.) **176**, 249*P*
The distribution of ^{125}iodine-labelled mouse immunoglobulin G in the uterus and placenta of pregnant mice (Peel & Stewart) **176**, 265, *dem*
Scaling placental oxygen diffusion to birthweight: studies on placentae from low- and high-altitude pregnancies (Mayhew) **175**, 187
Structure and permeability of the paracellular clefts of the microvascular endothelium in villi of the perfused delivered human placenta (Leach & Firth) **176**, 268, *dem*
Villous membrane thickness in the human placenta is principally determined by the volume fraction of the fetal capillaries (Burton & Feneley) **179**, 237, *dem*
Plasminogen activators, Synthesis of plasminogen activators by late embryonic rat hippocampi (Andrews & Seeley) **176**, 272, *dem*
Plasticity, neural, Neural plasticity of the hippocampal (CAI) pyramidal cell – quantitative changes in spine density following handling and injection for drug testing (Horner et al.) **174**, 229
Platelets, Autoradiographic analysis of vasoactive neuropeptide uptake by rabbit megakaryocytes and platelets (Daimon) **176**, 105
Potassium depletion, The effects of dietary potassium depletion on the ultrastructure of cardiac ventricular myocytes in rabbits: a morphometric study (Skepper et al.) **179**, 59
Pregnancy, The distribution of uterine macrophages in virgin and early pregnant mice (Stewart & Mitchell) **179**, 183
Glycocalyx carbohydrates of uterine epithelial cells increase during early pregnancy in the rat (Murphy & Turner) **177**, 109
Structural and functional reserve of steroidogenic membranes in stimulated luteal cells of pregnant rats (Meyer & Bruce) **177**, 31
The uterine response in pregnant inbred and non-inbred rats (Matthews & Peel) **178**, 101
Primates, Intraspecific variation and sexual dimorphism in cranial and dental variables among higher primates and their bearing on the hominid fossil record (Wood et al.) **174**, 185
Primitive streak, Development of primitive streak/neural plate overlap zone in chick and hamster (Farrow) **176**, 245*P*
Prostacyclins, Prostacyclin production in osteocytes and lining cells may be an early strain-related

step in mechanically adaptive bone remodelling (Rawlinson et al.) **179**, 218*P*

Prostacyclin synthetase, Prostaglandin synthetase and prostacyclin synthetase in mature rat skeletal muscles: immunohistochemical localisation to arterioles, tendons and connective tissues (McLennan & Macdonald) **178**, 243

Prostaglandin synthetase and prostacyclin synthetase in mature rat skeletal muscles: immunohistochemical localisation to arterioles, tendons and connective tissues (McLennan & Macdonald) **178**, 243

Rectum, Crypt mitotic activity in the rectum following surface desquamation and epithelial restitution (Gray & Thomas) **179**, 248, *dem*

Rectus sheath, The arcuate line of the rectus sheath – does it exist? (Rizk) **175**, 1

Regeneration, CNS, The effects of dopamine on neurites and growth cones of mammalian spinal cord neurons *in vitro* (Norman et al.) **176**, 260, *dem*

Factors affecting regenerative axonal growth of adult CNS neurons into peripheral nerve grafts: studies using retrograde labelling with HRP (Morrow et al.) **176**, 229*P*

Gap-43 in neurons of the mature mammalian brain during regeneration of their axons (Campbell et al.) **176**, 257, *dem*

Sprouting of optic nerve axons after transection of the optic nerve in adult rats (Zeng et al.) **176**, 258, *dem*

Regeneration, peripheral nerve, The effect of age on target muscle recovery, following nerve repair with a skeletal muscle autograft (Grieve) **176**, 234*P*

Renin, Intracellular production of adrenal renin in the fetal mouse. An immuno-electron microscopical study (Kon et al.) **176**, 23

Retina, Haemopoietic phagocytes in the early differentiating avian retina (Cuadros et al.) **177**, 145

Retinoic acid, *Situs inversus* in larvae of *Xenopus laevis* treated with retinoic acid (Bates) **179**, 215*P*

Retinoids, The effects of retinoids on the long bones of the rat and guinea pig (Keene et al.) **179**, 228, *dem*

Retinopathy, diabetic, The distribution of cotton-wool spots and hand exudates in diabetic neuropathy: an LM, TEM and SEM study (Dangoor et al.) **179**, 244, *dem*

Ricin, Ultrastructural changes in the nodose ganglion cells following an intraneural injection of Ricinus communis agglutin-60 into the vagus nerve in hamsters (Ling et al.) **179**, 23

RPS cell line, *In vitro* migration is regulated by extracellular pH in RPS cell line (Vesely) **176**, 252*P*

Schizophrenia, Assessing the strangeness of temporal lobe sulco-gyral patterns in schizophrenia, **176**, 231*P*

Schwann cell, Cyclic AMP mimics axonal control of Schwann cell phenotype (Morgan et al.) **176**, 239*P*

Scoliosis, A segmental analysis of thoracic shape in chest radiographs in children. Changes related to spinal level, age, sex side and significance for lung growth and scoliosis (Grivas et al.) **178**, 21

Serotonin, Postnatal serotonin depletion and the presence of sexually dimorphic groups of lumbosacral motor neurons in the Albino Swiss rat (Cowburn) **176**, 233*P*

Sertoli cells, Isolation of fetal and mouse Sertoli cells and the effects on the differentiation of fetal mouse ovaries *in vitro* (Mackay et al.) **176**, 264, *dem*

Shoulder joint, Subchondral architecture in bones of the canine shoulder (Simkin et al.) **175**, 213

Situs inversus, *Situs inversus* in larvae of *Xenopus laevis* treated with retinoic acid (Bates) **179**, 215*P*

Skeletal development, The effects of paralysis on skeletal development in the chick embryo. I. General effects (Hosseini & Hogg) **177**, 159

The effects of paralysis on skeletal development in the chick embryo. II. Effects on histogenesis of the tibia (Hosseini & Hogg) **177**, 169

Skeletal tissues, Anatomical adaptations in skeletal tissues (Currey) **179**, 224*P*

Skin, A quantitative microtopical morphological analysis of the innervation of human digital skin, **176**, 260, *dem*

Ultrastructural identification of Langerhans cells in normal swine epidermis (Romano & Balaguer) **179**, 43

Ultrastructural localisation of anionic sites at the dermo-epidermal junction in normal human skin (Nanchahal & Riches) **176**, 181

Variability of fibroblast morphology *in vivo*: a silver impregnation study on human digital dermis and subcutis (Novotny & Gnoth) **177**, 195

Skull, Cranial kinesis in embryos of akinetic forms (Presley) **179**, 234, *dem*

Intraspecific variation and sexual dimorphism in cranial and dental variables among higher primates and their bearing on the hominid fossil record (Wood et al.) **174**, 185

Small intestine, Adaptations of the rat small intestine to a single and a double period of undernutrition (Warren) **176**, 89

Somatotrophs, pituitary, Polarised exocytosis of secretory granules from pituitary somatotrophs does not appear to be dependent on the cytoskeleton (Elger & Morris) **179**, 215*P*

Spectrin, Effects of age on fibre structure, ultrastructure and expression of desmin and spectrin in fast- and slow-twitch rat muscles (Ansved & Edström) **174**, 61

Spermatic cord, Evidence for a direct arteriovenous connection (A–V shunt) between the testicular artery and pampiniform plexus in the spermatic cord of the tree shrew (*Tupaia glis*) (Rerkamnuaychoke et al.) **178**, 1

Spinal cord, Expression of vimentin and glial fibrillary acidic protein in the developing rat spinal cord: an immunocytochemical study of the spinal cord glial system (Oudega & Marani) **179**, 97

Vertebral level of the termination of the spinal cord in human fetuses (Vettivel) **179**, 149

Spine, cervical, The role of zygapophysial joint orientation and uncinate processes in controlling motion in the cervical spine (Milne) **178**, 189

Squamoso-petrous sinus, The squamoso-petrous sinus: a fetal remnant (Chell) **175**, 269

Stria terminalis, bed nucleus of, Immunohistochemical and electrophysiological evidence for oxytocin (OT) inputs to the bed nucleus of the stria terminalis (BST) of the lactating rat (Ingram & Moos) **179**, 243, *dem*

Subchondral architecture, Subchondral architecture in bones of the canine shoulder (Simkin et al.) **175**, 213

Subependymal layer, Distribution and fine structural analysis of undifferentiated cells in the primate subependymal layer (McDermott & Lantos) **178**, 45

Substance P, SP-like-immunoreactivity in equine lumbar spinal ganglia and cord (Kai-Kai) **176**, 259, *dem*

Superior colliculus, Quantitative study of the development of neurons and synapses in rats reared in the dark during early postnatal life. I. Superior colliculus (Fukui & Bedi) **174**, 49

Supraoptic nucleus, Sexual dimorphism in the distribution of glial fibrillary acidic protein in the supraoptic nucleus of the hamster (Suárez et al.) **178**, 79

Taxol, The long-term effects of taxol on explants of developing chick optic tectum in culture (Bird) **174**, 1

Teeth, The development and fate of the dental lamina in the mandibular first molar tooth in the rat (Khaejornbut et al.) **179**, 85

The development of enamel tubules during the formation of enamel in the marsupial *Monodelphis domestica* (Sasagawa & Ferguson) **179**, 47

Intraspecific variation and sexual dimorphism in cranial and dental variables among higher primates and their bearing on the hominid fossil record (Wood et al.) **174**, 185

Teeth, molar, Morphometric analysis of the developing murine molar tooth *in vivo* and *in vitro* (Jowett & Ferguson) **177**, 135

Tegmen tympani, Homology of the tegmen tympani in eutherian mammals (Presley) **179**, 235, *dem*

Tendon, Age-related changes in tendon fibrocartilage (Benjamin et al.) **179**, 127

The application of a novel type of force transducer in the measurement of *in vivo* flexor tendon loads (Wilson et al.) **179**, 225, *dem*

Are pathological degenerative changes in the equine superficial digital flexor tendon attributable to its overheating during exercise (Wilson & Goodship) **179**, 225, *dem*

Collagen fibril morphometry in transected rat extensor tendons (Matthew & Moore) **175**, 263

Ratios of cross-sectional areas of muscles and their tendons in a healthy human forearm (Cutts et al.) **176**, 133

The structure and immunohistochemistry of the suprapatella in the rat – a study of tendon fibrocartilage (Ralphs et al.) **176**, 269, *dem*

Tendon, quadriceps, Variations in the amount of calcified tissue at the attachments of the quadriceps tendon and patellar ligament in man (Evans et al.) **174**, 145

Testis, Influence of intratesticular oxytocin implants on the response of rat testis to ethanedimethane sulphonate (Nicholson et al.) **179**, 235, *dem*

Tetraploidy, Histochemical identification of primordial germ cells and differentiation of the gonads in homozygous tetraploid mouse embryos (Kaufman) **179**, 169

Thalamus, Collateral axons of cholinergic pontine neurons innervate functionally distinct nuclei in the thalamus of the rat. **176**, 232*P*

Thermoregulation, Thyroid morphology and function and its role in thermoregulation in the newborn southern elephant seal (*Mirounga leonina*) at Maquarie Island (Little) **176**, 55

Thoracic shape, A segmental analysis of thoracic shape in chest radiographs of children. Changes related to spinal level, age, side and significance for lung growth and scoliosis (Grivas et al.) **178**, 21

Thymus, Functional anatomy of the thymic microenvironment (Kendall) **177**, 1

Identification of neural profiles containing vasoactive intestinal polypeptide, acetylcholinesterase and catecholamines in the rat thymus, **174**, 131

Thyroid gland, Effects of excess iodine in chick embryo thyroid follicles: initial inhibition and subsequent hypertrophy (Guo et al.) **176**, 157

Thyroid morphology and function and its role in thermoregulation in the newborn southern elephant seal (*Mirounga leonina*) at Maquarie Island (Little) **176**, 55

Tibia, Platycnemic and eurenemic tibiae compared (Yellowley et al.) **179**, 217*P*

Tombs, The identity of the occupants of Tombs II and III or Vergina (Musgrave) **179**, 250, *dem*

Trachea, A light and electron microscope study of the secretory tissues of the mid-trimester human fetal trachea (Birchall et al.) **176**, 247*P*

Tractus solitarius, The nucleus of the tractus solitarius of the dog. A morphological and morphometric analysis (Pesini et al.) **176**, 113

Trigeminal ganglion, Inconspicuous nucleoli in cat trigeminal ganglion cells (Holland et al.) **176**, 243*P*

Ulnar collateral ligament, The ulnar collateral ligament of the human elbow joint. Anatomy, function and biomechanics. (Fuss) **175**, 203

Undernutrition, Adaptations of the rat small intestine to a single and a double period of undernutrition (Warren) **176**, 89

Some effects of undernutrition and subsequent rehabilitation on connectivity in the cerebellar cortex of young adult rats (Yucel et al.) **179**, 241, *dem*

Urea-excreting cells, A morphometric analysis of chloride cells in the gills of the teleosts

Oreochromis alcalicus and *Oreochromis riloticus* and a description of presumptive urea-excreting cells in *O. alcalicus* (Maini) **175**, 131

Uteroplacental vascular system, The development of the uteroplacental vascular system in the golden hamster *Mesoncricetus auratus* (Ogura et al.) **175**, 65

Uterus, The distribution of ^{125}iodine labelled mouse immunoglobulin G in the uterus and placenta of pregnant mice (Peel & Stewart) **176**, 265, *dem*

The distribution of uterine macrophages in virgin and early pregnant mice (Stewart & Mitchell) **179**, 183

Glycocalyx carbohydrates of uterine epithelial cells increase during early pregnancy in the rat (Murphy & Turner) **177**, 109

The ultrastructure of mast cells in the uterus throughout the normal menstrual cycle and the postmenopause (Drudy et al.) **175**, 51

The uterine response in pregnant inbred and non-inbred rats (Matthews & Peel) **178**, 101

Vagal efferents, Central projections of the nodose ganglion and the origin of vagal efferents in the lamb (Wild et al.) **175**, 105

Vasectomy, The response of the regional lymph node to epididymal sperm granulomas after vasectomy (McDonald et al.) **176**, 35

Thymus-dependent regions of the testicular lymph nodes show increased development following vasectomy (McDonald et al.) **176**, 269, *dem*

Veins, pro-otic, Homology of pro-otic veins in mammals (Presley) **179**, 213*P*

Veins, varicose, Assessment of the collagen and elastin content of primary varicose veins (Travers et al.) **179**, 251, *dem*
